NEW HALO 3 FEATURES

TRUEHALO.COM

CAMPAIGN MODE

"The campaign mode will be keeping score of your progress. That is, you gain actual points while playing, and the better you do (i.e more head shots, more sticks, etc) the higher your score. These of course will be applied to online leader boards. There is something called an Elephant in multiplayer that is literally a huge mobile base that can carry vehicles and players. The article said it's similar to the Sand Crawler the Jawas used in Star Wars. The strategy to use such a thing sounds very interesting.

MAP MAKER

The game features this pseudo-map maker called the Forge. The really unique thing about Forge is it's real time and co-op. You can place objects, weapons, crates, fusion cores, etc in real time with other players and then drop in and play the maps seamlessly. There are even a few game modes that have come out of this, like Jenga.

The maps can be uploaded and shared. You can log onto Bungie.net and browse the maps, and then queue them for download. As soon as you fire up **Halo 3**, the maps will be downloaded.
